THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH
USE OF TRAINED INTELLIGENCE ANALYSTS

50X1-HUM

1. Engines for automobiles and for aircraft are being produced at Rakovica, south of Belgrade. All parts of an automobile engine except carburetors and electric wiring (which are delivered from the Praga factory in Czechoslovakia) are manufactured here. The automobiles produced here are known as "Praga". Three Czechoslovak engineers from the Praga factory permanently represent their firm in Rakovica.
2. Cylinders and other parts of engines for the Rata aircraft are produced at Rakovica. These parts are then packed at Rakovica and sent to Rumania or Czechoslovakia, where aircraft are assembled. The parts of aero-engines produced at Rakovica are for the radial engine type which was formerly constructed under license from Hispano Suiza.
